SKILLS

Data cleaning
Python (pandas, NumPy), OpenRefine, Power Query

Analysis
Excel (lookups, pivot tables), Stata, Google Sheets

Databases
SQL (PostgreSQL), Supabase, ERDs

Visualisation
Power BI, Excel charts

Records and quality
Data labelling and QA, document verification, reconciliation, JFMIS

EDUCATION

Bachelor of Economics
Karatina University · 2025

Certificate in Data Analysis & Visualization
ADMI · 2026

Data Entry & Analysis using Excel
Ajira Digital · 2026

Introduction to Python
DataCamp · 2026

LANGUAGES

English (fluent), Swahili (native), Spanish (basic)

ACHIEVEMENTS

Two-time chess champion, Karatina University School of Business (2020, 2021)

PROFILE

Economics graduate and data analyst with hands-on experience cleaning, organising and checking data, and turning it into clear reports and dashboards. Skilled in Excel, SQL, Python and Power BI, with a careful eye for detail.

EXPERIENCE

Intern, Admissions and Academic Records
Feb 2026 – Present

Africa Digital Media Institute (ADMI) · Nairobi

- Process applications and admission records, checking each file is complete and accurate.
- Enrol admitted students into the right programmes and intakes, and keep student records up to date.
- Manage academic transcripts, verifying results against system records.
- Organise and cross-check enrolment data in Excel and Power BI.
- Answer applicant enquiries and support records for academic milestones, including graduation.

Private Contractor
Nov 2025 – Sep 2026

CloudFactory · Nairobi

- Data labelling and quality assurance (QA): labelled and validated real-time alerts from an AI risk-detection platform against public sources, to strict accuracy targets.

Finance & Accounts Attaché
2023 · 3 months

Principal Magistrate's Court · Karatina

- Reconciled revenue, deposit and expenditure accounts and tracked cash bail deposits in JFMIS.
- Kept case records in the Case Tracking System and helped prepare court tax filings for KRA.

Election Clerk
Aug 2022

IEBC · 2022 General Election

- Verified voter identities and managed ballot issuance in line with electoral procedures.

SELECTED PROJECTS

Data cleaning in three sectors `Python · OpenRefine · Power Query`
Cleaned farmer, mobile-loan and supermarket datasets: 300 sales de-duplicated to 285, 55 product spellings merged into 22, with a cleaning log for each.

Hospital database `PostgreSQL`
Business rules enforced with constraints and a trigger; eight reporting queries using CTEs and window functions.

Clinic database with row-level security `Supabase`
Patients see only their own records while doctors manage all, checked with five security tests.

Telecom churn dashboard `Power BI`
Shows who churns and what they have in common, so a retention team knows where to focus.
